

NOTICE OF RECEIPT OF THE PERMIT RENEWAL APPLICATION FOR SAFETY-KLEEN SYSTEMS, INC

Safety-Kleen Systems, Inc. (SKS) has applied to renew the Hazardous Waste Management Permit (TNHW-141) for its Shelby County facility at 3536 Fite Road, Millington, TN 38053. This permit allows SKS (EPA ID TND000614321) to store hazardous waste in containers in the storage unit, miscellaneous unit (return and fill) and tank. The Tennessee Department of Environment and Conservation's (TDEC), Division of Solid Waste Management (DSWM), received the required Part A and Part B hazardous permit applications on April 2, 2019, and revision of Part B application on June 24, 2019. This action follows the Pre-Application meeting conducted by the facility on May 22, 2019, as required by Tennessee Rule 0400-12-01-.07(1)(m). No comments were received at this meeting.

The permitted SKS hazardous waste facility has a maximum storage limit of 10,000 gallons in an aboveground storage tank, 17,690 gallons in a container storage area, and a miscellaneous unit (return and fill) with a capacity of 300 gallons that is emptied daily. The hazardous materials stored in these units include petroleum naphtha parts washer solvent, aqueous solvent, immersion cleaner, dry cleaning waste and paint waste collected from customers or generated on-site.

The current permit, issued on September 30, 2009, was effective for ten (10) years. Because this application was submitted at least 180 days before this permit's expiration, the facility may continue to operate under the current permit until the renewal permit is issued or denied. The permit allows the facility to store a maximum quantity of 27,990 gallons of hazardous waste in containers, a tank and a miscellaneous unit. No changes are requested in the renewal application. Renewal of this permit would allow the facility to continue its operation for up to ten years.

The permit renewal application also provides information on all solid waste management units (SWMUs) and areas of concern (AOCs) at the facility, including previous or ongoing investigations or corrective actions for all releases of hazardous wastes or hazardous constituents. The conditions of this permit will require that any future and existing SWMUs or AOCs be evaluated for potential releases and remediation, as necessary.

As set forth in the Regulations, a complete permit application, consisting of a Part A and a Part B, must include certain text, drawings and other information adequate to demonstrate that the facility will comply with the various technical and administrative standards applicable to such a facility. Evaluation of the renewal application involves an in-depth review of the application materials by DSWM staff and subsequent correspondence between DSWM and the facility identifying and correcting any deficiencies in the submitted information.

Once the permit application is determined to be complete, DSWM will make a tentative decision to either grant or deny the permit and issue either a draft permit or a notice of intent to deny the permit. A Public Notice will be published to announce this tentative decision, and the public will have at least 45 days to submit written comments on the draft permit/proposed action. A public hearing, if requested within this public comment period, may also be held to receive comments. After considering the comments received and making any appropriate revisions, the DSWM Director will issue a final permit decision to either issue a final permit or terminate the existing permit. A [Response to Comments](#) will also be issued at that time.

Electronic copies of the renewal application are available online at tn.gov/environment/notices/sks-millington and at the DSWM Central Office, TN Tower, 312 Rosa L. Parks Avenue, 14th Floor, Nashville, TN 37243 (615-532-0780). Paper copies are available for review at the Millington Public Library, 4858 Navy Road, Millington, TN

(901-872-1585) and at the TDEC Memphis Environmental Field Office, 8383 Wolf Lake Drive, Bartlett, TN 38133 (901-371-3000).

Further information on the application may be obtained by contacting Mr. Carl Williams at SKS (864-879-2062). Information, opinions, and inquiries may be directed to Ms. Rita A. Swett at rita.swett@tn.gov (615-532-0828) throughout the permit review process at DSWM's Central Office, TN Tower, 312 Rosa L. Parks Ave, 14th Floor, Nashville, TN 37243.
